Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

In view of the applicants' amendment/response filed October 01, 2003 in which it was established that the instantly claimed ***the method for making a polyaniline/HMW-second polymer complex is formed by oxidative polymerization of the aniline monomers in aqueous solution in the presence of HMW (High Molecular Weight greater than 100,000) second polymer having a polymeric unit with at least one sulfonic acid group, a composition having the polyaniline/HMW-second polymer complex having a polymeric unit with at least one sulfonic acid group and an organic electronic device having at least one layer including the polyaniline/HMW-second polymer complex; wherein the addition of the HMW-second polymer having a polymeric unit with at least one sulfonic acid group (HMW- high molecular weight greater than 100,000) to the aniline monomers prior to polymerizing, unexpectedly results in increased viscosity in the formed aqueous dispersions.***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited to show the state of the art of polyanilines and methods of preparing and end use in electronic devices, Cao, Parker,

Shacklette, Heeger, Gardner and Zhang. However, the references do not teach nor suggest the addition of HMW second polymer having a polymeric unit with a sulfonic acid group to the aniline prior to oxidative polymerization as instantly claimed.
